For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification.

Lorsban[®]-4E

EPA Reg. No. 62719-220

EPA 24(c) Special Local Need Registration SLN ID-950013
For Distribution and Use Only in the State of Idaho

For Control of Garden Symphylans Infesting Sugarbeets Grown for Seed

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Lorsban[®]-4E insecticide before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Lorsban-4E according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Lorsban-4E.

Directions for Use

Apply 2 quarts of Lorsban-4E per acre in at least 10 gallons of water per acre as a preplant incorporated treatment in the fall to protect sugarbeets from garden symphylans during the following growing season. Apply using suitable power-operated ground application equipment. Consult your cooperative agricultural extension service for additional information concerning garden symphylan control practices in your area.

Specific Use Restrictions:

- Apply only once in the fall for protection of sugarbeets grown the following year.
- **Chemigation:** Do not apply Lorsban-4E through any type of irrigation system for the use described in this supplemental labeling.
- Lorsban-4E should not be tank mixed with other pesticides, surfactants, or fertilizer formulations unless prior use experience has shown that combination to be non-injurious under local conditions of use.
- Maximum single application rate is 2 lb ai chlorpyrifos per acre.
- Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours unless PPE required for early entry is worn.
